

Service Manual

Power Amplifier

Amplifier
SE-A800SM2

Because of unique interconnecting cables, when a component requires service, send or bring in the entire system.

System: SU-A800DM2

Control amplifier	SU-C800UM2
Power amplifier	SE-A800SM2

Specifications (DIN 45 500)

20 Hz – 20 kHz continuous power output both channels driven	2 × 55 W (8 Ω)
1 kHz continuous power output both channels driven (THD 1 %)	2 × 70 W (8 Ω) 2 × 100 W (4 Ω)
63 Hz – 12.5 kHz continuous power output both channels driven (THD: 0.7 %)	2 × 65 W (8 Ω) 2 × 85 W (8 Ω)
Total harmonic distortion rated power at 20 Hz – 20 kHz	0.015 % (8 Ω)
Intermodulation distortion (50 Hz : 7 kHz = 4 : 1, SMPTE)	0.007 % (8 Ω)
Residual hum and noise	0.3 mV
Damping factor	70 (8 Ω) 35 (4 Ω)
Headphones output level/impedance	540 mV/330 Ω
Load impedance	
A or B, BI-WIRING	4 Ω – 16 Ω
A and B	8 Ω – 16 Ω
Input sensitivity/impedance	1 V/33 kΩ
S/N (rated power, 4 Ω)	95 dB (110 dB, IHF '66)
Frequency response	5 Hz – 70 kHz (+0 dB, -3 dB) +0 dB, -0.5 dB (20 Hz -20 kHz)

■ GENERAL	
Power supply	
For (E) and (EG) areas	AC 50 Hz, 230 V
For (EB) area	AC 50 Hz, 230 V – 240 V
Power consumption	230 W
Dimensions (W × H × D)	430 × 136 × 348 mm
Weight	8.7 kg

- Notes:
- Specifications are subject to change without notice.
Weight and dimensions are approximate.
 - Total harmonic distortion is measured by the digital spectrum analyzer.

Recording	9	Replacement Parts List (Cabinet, Packing and Accessories)	28
Operation Check and Main Component Replacement Procedures	8 – 11	Packaging	29

■ Before Repair

- (1) Turn off the power supply. Using a 10 Ω , 10 W resistor, connect both ends of power supply capacitors (C701, C702) in order to discharge the voltage.
- (2) Before turning the power supply on, after completion of repair, slowly apply the primary voltage by using a power supply voltage controller to make sure that the consumed current at 50 Hz in NO SIGNAL mode should be shown below with respect to supply voltage 230 V/240 V.

Power supply voltage	AC 230 V	AC 240 V
Consumed current 50 Hz	100 ~ 200 mA	100 ~ 200 mA

■ Protection Circuitry

The protection circuitry may have operated if either of the following conditions is noticed:

- No sound is heard when the power is switched ON.
- Sound stops during a performance.

The function of this circuitry is to prevent circuitry damage if, for example, the positive and negative speaker connection wires are "shorted", or if speaker systems with an impedance less than the indicated rated impedance of this unit are used.

If this occurs, follow the procedure outlined below:

1. Switch OFF the power.
2. Determine the cause of the cause of the problem and correct it.
3. Switch ON the power once again.

Note:

When the protection circuitry functions, the unit will not operate unless the power is first switched OFF and then ON again.

■ Accessories

- AC power supply cord
(E) and (EG) areas : (RJA0019-2K) 1
- Amplifier connection cable
(RJL6D001B10) 1
- Remote control transmitter
(RAK-SU228WH) 1

(EB) area : (RJA0049-K) 1

- Stereo connection cable
(SJP2276) 1

- Batteries for remote control transmitter
(UM-4, "AAA", R03) 2

Note: These are available on sales route.

■ Caution for AC Mains Lead

[for (EB) area code model only]

For your safety, please read the following text carefully.

This appliance is supplied with a moulded three pin mains plug for your safety and convenience.

A 5-ampere fuse is fitted in this plug.

Should the fuse need to be replaced please ensure that the replacement fuse has a rating of 5-ampere and that it is approved by ASTA or BSI to BS1362.

Check for the ASTA mark  or the BSI mark  on the body of the fuse.

If the plug contains a removable fuse cover you must ensure that it is refitted when the fuse is replaced.

If you lose the fuse cover the plug must not be used until a replacement cover is obtained.

A replacement fuse cover can be purchased from your local dealer.

CAUTION!

IF THE FITTED MOULDED PLUG IS UNSUITABLE FOR THE SOCKET OUTLET IN YOUR HOME THEN THE FUSE SHOULD BE REMOVED AND THE PLUG CUT OFF AND DISPOSED OF SAFELY. THERE IS A DANGER OF SEVERE ELECTRICAL SHOCK IF THE CUT OFF PLUG IS INSERTED INTO ANY 13-AMPERE SOCKET.

If a new plug is to be fitted please observe the wiring code as shown below.

If in any doubt please consult a qualified electrician.

IMPORTANT

The wires in this mains lead are coloured in accordance with the following code:

Blue: Neutral

Brown: Live

As the colours of the wires in the mains lead of this appliance may not correspond with the coloured markings identifying the terminals in your plug, proceed as follows:

The wire which is coloured BLUE must be connected to the terminal in the plug which is marked with the letter N or coloured BLACK.

This apparatus was produced to BS 800.

The wire which is coloured BROWN must be connected to the terminal in the plug which is marked with the letter L or coloured RED.

Under no circumstances should either of these wires be connected to the earth terminal of the three pin plug, marked with the letter E or the Earth Symbol .

Before use

Removal the connector cover as follows.

How to replace the fuse

1. Remove the fuse cover with a screwdriver.

2. Replace the fuse and attach the fuse cover.

Connections

Stereo connection cable

White (L) Blanco (L) Vit (L)

- Make sure that the power supply for all components has been turned off before making any connections.
- Connect the power cord to the amplifier only after all other connections between components have been made.

The symbols (a, b, c etc.) used in this diagram are inserted for reference when using the companion volume.

1 Control amplifier and power amplifier connections

PRE OUT 2 terminals

These terminals let you connect a second power amplifier.

2 Component connections

If connecting a graphic equalizer A

Connect it between the PRE OUT terminals of the control amplifier and the INPUT terminals of the power amplifier.

Connecting the speakers **A**

The wires which are connected to the positive (+) terminals of the amplifier should be connected to the positive (+) terminals of the speakers. The negative (-) terminals should be connected in a similar way.

Speaker cables (not included)

To connect speaker cables to terminals **B**

- ① Strip off the outer covering, and twist the center conductor.
- ② Turn the knob completely to the left.
- ③ Insert the wire and turn the knob completely to the right. Pull the cord to assure a proper connection.

■ "B" terminals

For connection to a second pair of speakers.

■ Speaker impedance

- When only the "A" or only the "B" terminals are used: 4-16 Ω
- When both the "A" and the "B" terminals are used simultaneously: 8-16 Ω

CAUTION **C**

To prevent damage to circuitry, never short-circuit the positive (+) and negative (-) speaker wires.

Connecting the power supply **D**

Connect the power supply only after all other connections have been made.

Insertion of Connector

Even when the connector is perfectly inserted, depending on the type of inlet used, the front part of the connector may jut out as shown in the drawing. However there is no problem using the unit.

Cooling fan **E**

The cooling fan operates at high power output levels only.

■ Front Panel Controls

POWER METER LIGHT

① **Power “ STANDBY ON” switch
(POWER, STANDBY ON)**

Press to switch the unit from on to standby mode or vice versa. In standby mode, the unit is still consuming a small amount of power.

② **“REMOTE STANDBY” indicator
(REMOTE STANDBY)**

The indicator lights up in the below cases.

- When the control amplifier is in the OFF state and this switch is set in the “ ON” position
- When both amplifiers are ON and then turned OFF simultaneously from either the control amplifier POWER switch or the remote control transmitter.

While this indicator is lit, this unit can be activated from either POWER switch of the control amplifier or the remote control transmitter.

③ **Operation indicator (OPERATION)**

④ **Headphones jack (PHONES)**

⑤ **Speaker select buttons/indicators (SPEAKERS)**

■ Operation Check and Main Component Replacement Procedures

NOTE

1. This section describes procedures for checking the operation of the major printed circuit boards and replacing the main components.
2. For reassembly after operation checks or replacement, reverse the respective procedures. Special reassembly procedures are described only when required.
3. Select items from the following index when checks or replacement are required.
4. Refer the parts No. on the page of "Main Component Replacement Procedures", if necessary.

● Contents

•Checking Procedure for each P.C.B.

1. Checking for the main P.C.B. Page. 8,9.

•Main Component Replacement Procedures

1. Replacement for the power IC and regulator transistor. 10,11.
2. Replacement for the fan motor. 11.

■ Checking Procedure for each P.C.B.

1. Checking for the main P.C.B.

**Step 6**

Remove the flat cable from cord clasper.

**Step 8**

Remove the hooks.

**Step 9**

Release the claws, and then remove the rear panel.

• Check the main P.C.B. as shown below.

Step 13

Remove the flat cable from connector (CN703).

Step 12

Release the hooks.

**Step 15**

Connect the lead wire.

GND plate

**Step 16**

Connect the flat cable to connector (CN703).

■ Main Component Replacement Procedures

1. Replacement for the power IC and regulator transistor

- Follow the **Step 1** ~ **Step 3** in item 1 on checking procedure for each P.C.B. on page 8.

Step 1 Cut the joints as shown below.(6 portions)

Step 3
Unsolder the terminals of power IC and regulator transistor.

Step 2 Fold the joints.(6 portions)

CAUTION

- After replacing the power IC or regulator transistor, apply a sufficient quantity of compound grease (RFKX0002) between the heat sink and the power IC or regulator transistor (Radiation of power IC).
- Tighten enough the screws (a) after replacing the power IC and regulator transistor. Otherwise, the heat radiation works little.

Installation of the bottom cover after replacement

2. Replacement for the fan motor

- Follow the **Step 1** ~ **Step 9** in item 1 on checking procedure for each P.C.B. on pages 8 and 9.

NOTE

When replacing the fan motor, align the boss of the fan case with the hole of the fan motor.

- Step 2**
Put a screwdriver at the root of the fan and remove it.

- Step 3**
Remove the fan cap.

- Step 5**
Remove the fan motor.

- Step 4**
Remove the fan terminal cap.

■ Schematic Diagram

- This schematic diagram may be modified at any time with the development of new technology.

Notes:

- **S801** : Power "STANDBY  /ON" switch (POWER, STANDBY  /ON)
- **S802** : Speaker select switch (SPEAKER A)
- **S803** : Speaker select switch (SPEAKER B)
- Voltage values and waveforms are measured as indicated in the schematic diagram when test points between **TP701** and **TP702**, and between **TP703** and **TP704** are shorted.
- Indicated voltage values are the standard values for the unit measured by the DC electronic circuit tester (high-impedance) with the chassis taken as standard. Therefore, there may exist some errors in the voltage values, depending on the internal impedance of the DC circuit tester.
No mark: Power ON
- Voltage and signal line

- Important safety notice:
Components identified by  mark have special characteristics important for safety.
Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used. When replacing any of components, be sure to use only manufacturer's specified parts shown in the parts list.
- **Caution!**
IC and LSI are sensitive to static electricity.
Secondary trouble can be prevented by taking care during repair.
Cover the parts boxes made of plastics with aluminum foil.
Ground the soldering iron.
Put a conductive mat on the work table.
Do not touch the legs of IC or LSI with the fingers directly.

■ Replacement Parts List (Electrical)

Notes: *Important safety notice:

Components identified by Δ mark have special characteristics important for safety.

Furthermore, special parts which have purposes of fire-retardant (resistors), high-quality sound (capacitors), low-noise (resistors), etc. are used.

When replacing any of components, be sure to use only manufacture's specified parts shown in the parts list.

*The parenthesized indications in the Remarks columns specify the areas. (Refer to the cover page for area.)

Parts without these indications can be used for all areas.

* [M] Indicates in Remarks columns parts that are supplied by MESA.
